

## Custom hydraulic manifolds.

**We can do that.**

## Optimize system performance with custom solutions.

Custom manifold systems have been proven to lower hardware cost, improve performance, reduce the number of fluid connections and leak points, and are more compact than traditional line mounted valve systems. Through detailed 3D modeling, careful circuit analysis, component selection, followed by testing, prototyping and product documentation, your imagined custom systems solutions become reality.

At Price Engineering, we are more than a distributor - we are your custom solutions partner.

 *We make motion work.*
